DETAILED ACTION

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-22 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Applying the subject matter eligibility test to claim one:

Is claim one a process, machine, manufacture or composition of matter?

Yes, claim one is a process.

Does the process recited by claim one require that the method recited be implemented by a particular machine?

No.

Do the method steps recited by claim one particularly transform a particular article?

No.

As a result, the method recited by claim one is not eligible.

Claims 2 to 22 depend on claim 1.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 3663

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-22 are rejected under 35 U.S.C. 102(b) as being anticipated by Thomson (6,128,580).

With respect to claim one, Thomson discloses:

A method of processing acoustic signals [taught by the abstract]using the steps of:
obtaining seismic signals from a plurality of receivers [taught by figure 5A, #500; figure 1A and 1B];
identifying receiver functions within the acoustic signals [taught by figure 8, #90]; analyzing said receiver functions for velocity or moveout characteristics [taught by figure 8, #100]; using the result of said analyzing step to determine properties of multiple layers of earth located below said receivers [taught by figure 8, # 110].

Claims 2 to 4 are taught by column 7, lines 35 to 55.

Claims 5 and 6 are taught by column 7, line 3.

Claims 7 to 13 are taught by figures 5B and 6.

Claims 14 to 22 are taught by figures 8 to 12.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The references cited show the level of skill in the art.
